

August 2018

Dear Colleague,

While many Practices are keen to implement Year of Care (YoC) planning at their surgeries, a certain amount of frustration has been expressed with regard to accessing IT support and YoC resources

To support the implementation of YoC there is a helpful website "Care & Support Planning post training resources". <http://tvscn.nhs.uk/networks/long-term-conditions/care-and-support-planning-post-training-resources/> . The password is *careplanning*

Here, you will find useful resources to help in implementing Care Planning in your practice as well as generic templates that could be adopted for your use.

These helpful resources and documents include:

- Care Planning Top Tips
- Care Planning Practice Checklist
- Care and support Planning information leaflet
- Implementing care and support planning
- Preparing-for-care-planning-test-results-all-possible-results-explanation
- Practice TV screen slides for Care Planning
- Year of Care Evaluation Toolkit v0.2
- Templates - Here you will find all the Care Planning templates you need including sample appointment letters, leaflets, and blank results.

Click on links on the front page of the website to download documents. These are word documents and may be amended to suit your practice However, if they are altered significantly YoC have requested that their logo is removed

To the right of the page you will find links to the IT System specific guidance for EMIS, SystemOne and Vision. Click on your Practice IT System for access to the implementation and user guide. Along with electronic copies of the YoC templates, document and letters you may view all the read codes that are currently being used.

If you would like any more information please contact Lesley Simpson
lesley.simpson7@nhs.net

Best regards
