

# West Oxfordshire Locality Group GP Commissioning Support Pack 2018-19

The purpose of this pack is to aid discussion around the use of healthcare services in order to help practices make best use of local resources and identify practice priorities for 2018/19.

Please complete the separate commissioning checklist before the Practice Commissioning Pack (PCP) meeting.

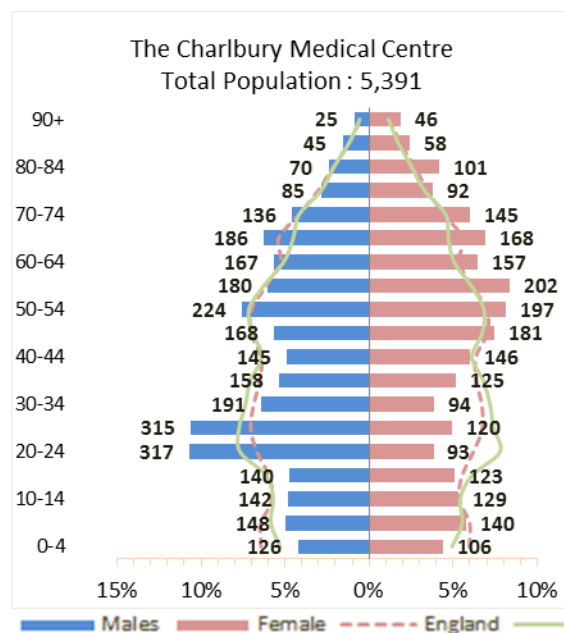

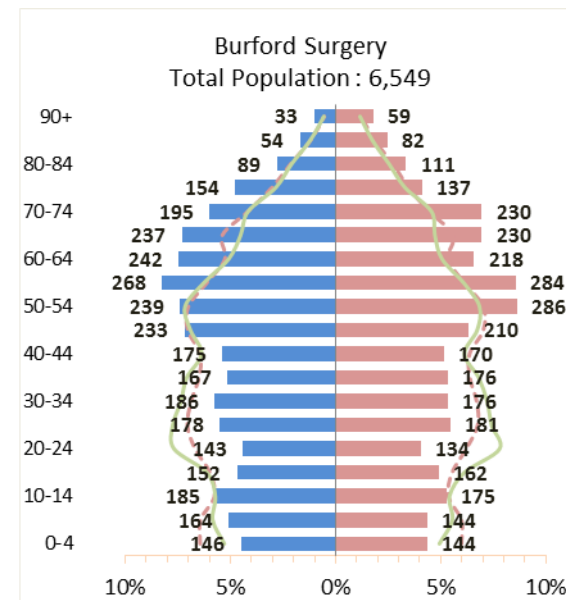

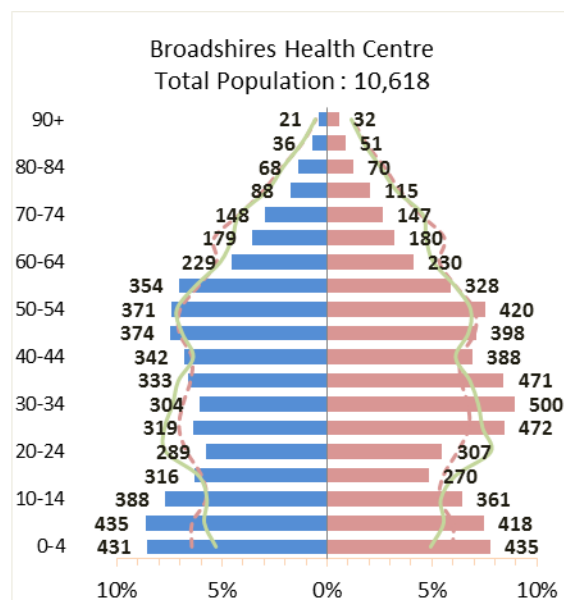

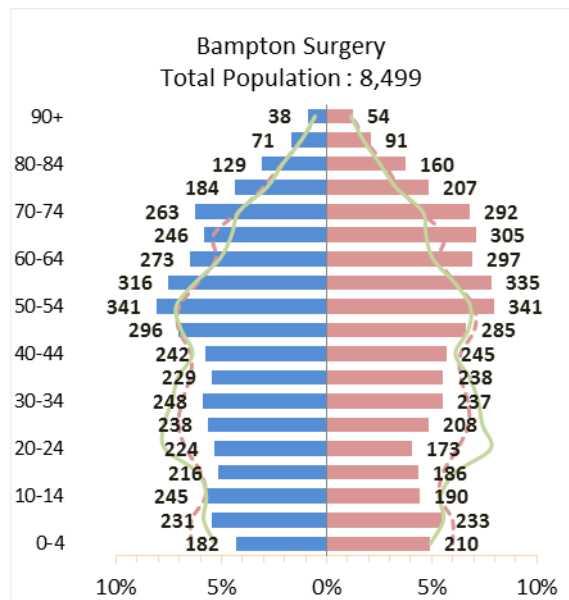

## West Contents Page

• Practice Population Profiles at April 2018	P3
• Housing and Population growth predications for the next 5-10yrs	P5
• Estimated IMD scores for practices	P6
• JSNA Locality summary	P7
• Urgent care – A&E + MIU	P8
• Urgent care – A&E	P12
• Urgent care – A&E In Hours (0800-18.30) A&E Attendances	P14
• Urgent care – A&E Out of Hours (18.30-0800) A&E Attendances	P16
• Urgent care Out of hours GP Service	P18
• Urgent care – A&E All Emergency Admissions	P20
• GP Access Fund/Hub Provision: available appointments and activity	P22
• Primary Care Visiting Service: available appointments and activity	P26
• Care/Nursing Home: Urgent Care Activity	P27
• Flu – Achievement by locality	P28
• Flu – over 65's	P29
• Flu – under 65's	P30
• Flu – Children	P31
• Flu – pregnant women	P32
• First Outpatient Appointment GP Referred	P34
• First Outpatient Appointment GP Referred Cardiology	P36
• First Outpatient Appointment GP Referred Dermatology	P38
• First Outpatient Appointment GP Referred ENT	P40
• First Outpatient Appointment GP Referred Gynaecology	P42
• First Outpatient Appointment GP Referred Ophthalmology	P44
• Email advice (Use of) 2017-2018	P46
• Learning Disability – Uptake of Annual Health Checks	P50
• Dementia in Oxfordshire	P52
• Diabetes	P54
• Data caveats and explanations	P56

# Estimated IMD Scores for GP Practices based on where registered patients live

MOST  
DEPRIVED

LEAST  
DEPRIVED

North North East Oxford City South East South West West CCG Average

The Indices of Deprivation 2015 provide a set of relative measures of deprivation for small areas (Lower-layer Super Output Areas) across England, based on seven domains of deprivation. The domains were combined using the following weights to produce the overall Index of Multiple Deprivation (IMD):

- Income Deprivation (22.5%)
- Employment Deprivation (22.5%)
- Education, Skills and Training Deprivation (13.5%)
- Health Deprivation and Disability (13.5%)
- Crime (9.3%)
- Barriers to Housing and Services (9.3%)
- Living Environment Deprivation (9.3%)

In addition to the Index of Multiple Deprivation and the seven domain indices, there are two supplementary indices: the Income Deprivation Affecting Children Index (IDACI) and the Income Deprivation Affecting Older People Index (IDAOPI).

The chart below displays in descending order estimated IMD Score for GP practices based on where their patients live.

This has been estimated by using the number of patients registered to a specific GP Practice (April 2018) split by LSOA and then the IMD scores of each of these LSOAs to calculate a population weighted average.

# Urgent Care - A&E and MIU Attendances

## Direct age-sex Standardised Rate per 1,000, April 2017 - March 2018

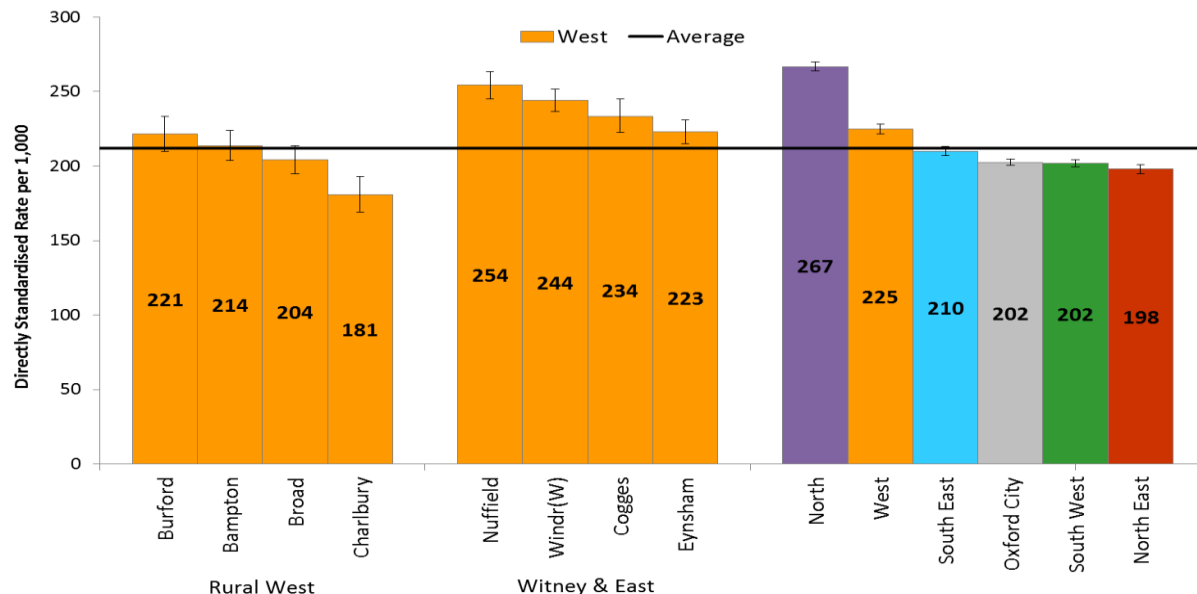

\*Attendances at Type 1 and Type 3 (Oxford Health)  
A&E Depts only  
Luther Street excluded due to low population

### Note:

\*\*K84065 Sibford Gower Surgery data taken from February Immform report as January data unavailable.

†Number of practices for which the % uptake is lower than the lower quartile minus 1.5 times the interquartile range.

### For the England totals:

\*England total taken from gov.uk  
([https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/710416/Seasonal\\_influenza\\_vaccine\\_uptake\\_in\\_GP\\_patients\\_winter\\_season\\_2017\\_to\\_2018..pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/710416/Seasonal_influenza_vaccine_uptake_in_GP_patients_winter_season_2017_to_2018..pdf))

Data for ages 4, 5 and 6 not published.

Data is provisional and represents 99.8% of all GP practices in England responding to the January 2018 Main GP survey and 99.6% of all GP practices in England responding to the January 2018 Child GP Flu Survey.

Where a total for England is quoted (e.g. sum of number of patients registered and number vaccinated) this is taken from the 99.8% GP practice sample for the main survey and 99.6% for the Child GP Flu Survey and is therefore NOT an extrapolated figure for all of England.

## Percentage of Type 2 Diabetics Receiving 8 Key Care Processes, April 2017 - March 2018

Nettlebed Surgery, Bicester Health Centre and Sibford  
Surgery excluded as these practices do not use EMIS

Source: EMIS Data as at March 2018

## Percentage of Type 2 Diabetics Reaching Triple Target (HbA1c <59, BP <140/80, Chol <5), April 2017 - March 2018

Nettlebed Surgery, Bicester Health Centre and Sibford  
Surgery excluded as these practices do not use EMIS

Source: EMIS Data as at March 2018

## **2018 Practice Commissioning Packs – notes about the data**

### **Practice Populations**

Total populations are as at 1st April 2018 for Practices within Oxfordshire Clinical Commissioning Group (Figures exclude armed forces and prisoners).

### **Data Sources**

Data provided in the Outpatients, Emergency Admissions and A&E/MIU sections are all from SUS (Secondary Uses Services). SUS data comes directly from the Providers' systems. It is at patient level and gives information about the care that patients receive at NHS Acute Hospitals.

Other data sources are used within the packs as follows:

Email Advice – SLAM (Service Level Agreement Monitoring). This is the data submitted by Acute Providers to show performance against their contract.

Out of Hours data – supplied by Oxford Health NHS Foundation Trust

Mental Health Referrals – National Mental Health Dataset (MHSDS)

Flu immunisation data – Immform

Dementia data – NHS England secondary analysis of the QOF monthly dementia register data published by the HSCIC

### **Email Advice**

- Data Source: SLAM (Service Level Agreement Monitoring)
- Count of the number of email advice requests made by GP Practices and presented by Specialty.
- Presented by Practice / Locality per 1,000 population

### **Mental Health Referrals**

- Data not available due to issues CSU have had in being able to access the correct datasets.

## **Points to note about the activity data:**

The period covered is April 2017 to March 2018 unless otherwise stated.

### **Outpatient appointments**

- Data Source: SUS.
- These charts show GP referred first outpatient attendances. These are appointments which are coded as having been referred by a GP, and can be one of the following:
  - Consultant-led first appointment
  - An Outpatient Procedure, for example when a procedure is carried out as part of a first appointment
- Non Face-to-Face (Non-F2F) appointments and e-mail advice excluded. There may be insignificant residual Non-F2F activity in the T&O, Ophthalmology, gynaecology and ENT specialty specific charts
- This methodology is slightly different from previous years to ensure a more relevant and consistent measure across the localities. Data is not therefore directly comparable with last year's pack

### **Out of Hours GP Service data**

- Data Source: Oxford Health NHS Foundation Trust
- This is a count of the number of "contacts". A contact can either be a telephone call, a telephone call followed by a visit to the Out of Hours Centre, or a telephone call followed by a home visit.
- The data has been checked to make sure that it does not contain duplicates.
- The Rycote Practice and its population have not been included in the OOH GP charts as its patients are referred to the Bucks Out of Hours service. Currently we do not have data for that service. PCSE did not respond to requests for data on actual transfers.

### **JSNA 2018**

The Joint Strategic Needs Assessment provides information about Oxfordshire's population and the factors affecting health, wellbeing, and social care needs. It brings together information from different sources and partners to create a shared evidence base, which supports service planning, decision-making, and delivery.

## A&E Activity Definitions

A&E, in this context means all types of A&E provision including Type 1, Type 2, Type 3, Type 4 department and urgent care centres that average more than 50 attendances per week. This average should be calculated over a quarter.

Types of A&E service are:

Type 1 A&E department = A consultant led 24 hour service with full resuscitation facilities and designated accommodation for the reception of accident and emergency patients

Type 2 A&E department = A consultant led single specialty accident and emergency service (e.g. ophthalmology, dental) with designated accommodation for the reception of patients

Type 3 A&E department / Type 4 A&E department / Urgent Care Centre = Other type of A&E/minor injury units (MIUs)/Walk-in Centres (WiCs)/Urgent Care Centre, primarily designed for the receiving of accident and emergency patients. A type 3 department may be doctor led or nurse led. It may be co-located with a major A&E or sited in the community. A defining characteristic of a service qualifying as a type 3 department is that it treats at least minor injuries and illnesses (sprains for example) and can be routinely accessed without appointment. An appointment based service (for example an outpatient clinic) or one mainly or entirely accessed via telephone or other referral (for example most out of hours services), or a dedicated primary care service (such as GP practice or GP-led health centre) is not a type 3 A&E service even though it may treat a number of patients with minor illness or injury.
