

Psychiatry for GPs study session

Wednesday 15th May 2019

13:15 (registration from 12:45)—17:00

Kassam Stadium, Grenoble Road, Oxford OX4 4XP

About this session:

A half-day session for GPs focused on acute psychiatry presentations in a primary care setting.

The session will feature short talks from expert speakers and will focus on presentations encountered regularly by GPs. It will also include further training opportunities and resources to use in clinical practice.

The event has incorporated feedback from previous events and includes the topics below as requested by the GPs who attended.

- Side effects of Psychotropic drugs
- Chronic Fatigue Syndrome/Myalgic Encephalomyelitis (CFS/ME),
- Resilience and Children and Young People
- Managing Depression and Anxiety in Older Adults
- Detail of local services and resources for mental health support

Join GP colleagues to hear from expert speakers and join the discussion. Places are likely to fill up fast so please register today at the following link:
