

Postgraduate Diploma Physician Associate

Are you a GP practice interested in taking on the next generation of Physician Associates?

The Physician Associate is a rapidly growing healthcare role in the UK, working alongside doctors in GP practices and within hospitals in the diagnosis and management of patients.

If you would like to help shape the future of the NHS and be able to provide a placement for one of our students on this exciting new course, please get in touch with Dr Sham Sabri, Programme Director, School of Health Care and Social Work.

Our intensive postgraduate programme equips students with the knowledge and skills to become physician associates and have a positive impact on the patient journey.

Every student benefits from community-based placements and the support of a team of experienced teachers.

In year One they will study general and adult medicine and complete clinical placements typically at GP practices and within general medicine. In year two they will study specialist and acute medicine alongside a clinical placement.

At Bucks, we have a range of partnerships within the local community, particularly with NHS trusts.

We have partnerships with:

- Imperial College Healthcare NHS Trust
- The Hillingdon Hospitals NHS Foundation Trust
- London North West Healthcare NHS Trust
- Central and North West London NHS Foundation Trust
- Buckinghamshire Healthcare NHS Trust.

We value the relationships between professionals and public health users.

Our aim is to make sure by the end of the course each student shares our vision of improving the access to high quality services within the NHS and local communities.

Contact us today or visit our website to find out how to apply.
