

Digital Proactive Care Plans

The PCP view has been developed to display information recorded by GPs in their clinical systems to create personalised care plans for their patients. These care plans are intended to assist clinicians providing unplanned care.

Some of this information is also available in the standard medical views. Other information, which is specifically about care planning, can only be found in this view. Where explanation of terms may be required, we have added information in hover boxes in the OCS.

The information is presented in a series of tabs:

- **PCP Summary:** *key information e.g. resuscitation status, anticipatory planning for hospitalisation, preferred place of care*
- **About the Patient:** *e.g. housebound, donor wishes, syringe driver/equipment*
- **Advance Planning:** *e.g. power of attorney, advance statements*
- **Carers and other professionals:** *carer and health professionals involved*
- **Recent observations:** *e.g. heart/respiratory rates, O2, peak flow, blood glucose*
- **Attached care documents:** *e.g. resus status, advance statements, care plans*

NB: for some Oxfordshire patients (registered at Vision practices), only the **Attached care documents** tab will be available

PCP Summary

The landing page of the Proactive Care Plans view on the OCS contains information on the patient's resuscitation status, anticipatory care planning and patient preferences, as well as residency and religion
