

OCCG SERVICE SPECIFICATION (2021/22) FIRST EXAMINATION OF THE NEWBORN

1. Introduction

In line with current clinical practice all neonates can expect to receive a medical examination within 72 hours of birth. Oxfordshire CCG currently commissions intrapartum care from secondary care providers and paediatricians provide a check for the vast majority of neonates before discharge.

In a small number of cases mothers choose a home delivery. In such cases, whilst intrapartum care continues to be provided by Community Midwives, the mother's own GP has often provided the first examination of the newborn rather than expecting mother and baby to return to hospital for the examination.

We also need to recognise that a number of new deliveries involve the neonate leaving hospital in much shorter time periods than historically. This can lead to the neonate not receiving a medical examination in hospital. Therefore this specification covers the medical examination/intrapartum care for these newborns also.

The following link accesses the Child Health Promotion programme and the relevant section relating to the newborn physical examination can be found on page 38.

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/167998/Health_Child_Programme.pdf

For additional information, the Newborn and Infant Physical Examination Standards and Competencies, January 2013, can be found at

<http://newbornphysical.screening.nhs.uk/cms.php?folder=2365> Refer to screening tests for description of newborn physical checks

No part of this specification by commission, omission or implication defines or redefined essential or additional services.

2. Aims

The aim of commissioning GPs to carry out this examination is to:

- Support women in their choice to have home based intrapartum care
- Support a limited number of early discharged newborns
- Ensure appropriate examination of the newborn is undertaken

This service in no way replaces the need for intrapartum care to be provided by the Hospital Maternity Departments, as the normal route.

3. Service Outline

Under this service specification the following will be funded:

- Completion of the neonate check in a location to be agreed between GP and mother, not necessarily the GP surgery
- Completion of the relevant documentation in the Maternity Record
- The check should be undertaken following discharge or home birth, up to a **maximum of 72 hours after birth.**

4. Exceptions

There will be times when the examination cannot take place within 72 hours of birth during normal practice hours, e.g. bank holiday weekends. Practices should ensure that the reason for late examinations is thoroughly documented in patient records. In order to allow for bank holiday closures, a late examination will be accepted for payment if it takes place on the next working day after the practice is notified of birth or discharge.

Patients who are not registered either temporarily or permanently with the practice are not covered by this service specification.

5. Payment

Practices will receive £53.04 per individual check performed. Payment will be made based on actual activity carried out as reflected in quarterly activity monitoring reports to the CCG.

6. Monitoring

Data will be extracted from the EMIS practice system by SCWCSU around the 15th of the month following the end of each quarter to monitor activity. (Deadlines to be confirmed each quarter by SCWCSU).

All newborn patients receiving this service must be registered permanently or as temporary residents with the practice as NHS patients.

7. Termination

This service will terminate on 31st March 2022. For termination ahead of this 3 months written notice must be given.

APPENDIX 1

Data Collection Specification for Primary Care Service for First Examination of the Newborn 2021/22

	Item	Read code	Read code description	Snomed code	Snomed description
Search Population	Babies aged under 3 months with neonatal check recorded in the fiscal year to the end of the reporting period	64B% excluding 64B1 and 64B6	Child exam - birth	170099002	Child examination - birth (procedure)
				410621008	Well child visit, newborn (procedure)
Payment Criteria	Number of babies with neonatal check within 5 days of the baby's birth in the fiscal year to the end of the reporting period	64B% excluding 64B1 and 64B6	Child exam - birth	170099002	Child examination - birth (procedure)
				410621008	Well child visit, newborn (procedure)

Please note: The CSU have advised that the mapping from Read to SNOMED is not straightforward. EMIS has mapped additional SNOMED codes to 64B% under the hierarchy 170099002:

275735001 Baby normal at birth

170105000 Birth examination abnormal - on treatment

170104001 Birth examination abnormal - referred

170103007 Birth examination abnormal - for observation

268484008 Child birth exam. - birth NOS

including hierarchy:

410621008 Well child visit, newborn (procedure)

Dual running of the data has been done like for like, but they will continue to monitor if the same activity is being brought through. Additionally, the previous excluded Read codes of 64B1 and 64B6 are not included in the SNOMED hierarchies.

Data extraction is cumulative throughout the fiscal year taken at the end of each quarterly period. In all cases, patients who have died or left during the reporting period, but who have received a service within the practice will be included. Temporary residents will be included.
