

Support for the Cancer Elements of the PCN DES and QoF Quality Improvement Module: Early Cancer Diagnosis

To help support practices in delivering the requirements of the PCN DES in relation to cancer the CCG have put together a support pack. There is also information and support for the completion of the QoF Early Cancer Diagnosis QI Module.

The Pack includes;

- 1. PCN DES and QoF QI Module Early Diagnosis of Cancer Help Sheet**
- 2. OXFORD Cancer Training Available to GPs and Practice Staff**
- 3. PCN QI timetable Ox**
- 4. Quality Improvement Action Ideas**
- 5. Cancer screening presentation (LD Patients)**
- 6. GP LD tool kit**
- 7. OCCG Cancer Support during Covid-19 Patient Info leaflet V2.1**
- 8. CRUK PCN Webinar Final**

UPDATE:

- 9. Summary of Changes QOF Guidance v. original - Cancer QI**
- 10. QOF QI Reporting Template Final Cancer 2020-21**
- 11. CRUK offer of support**

We are also looking to re-invigorate the cancer screening support scheme which many practices are signed up to. Once this has been finalised with the TVCA team, we will communicate out to practices. This is likely to happen late October

This will be adjusted to complement the requirement of the DES and QoF module as well as reflect the current impacts COVID has had.

Please be aware that any practices wishing to take up the offer of training from CRUK facilitators, this will only be available between the months of September and December.

Please direct queries to occg.plannedcare@nhs.net

Many Thanks

Zoe Kaveney
