

EMIS Library rationalisation

In preparation for phase 2 of SNOMED CT implementation, we're performing some housekeeping on our EMIS Library resources. This means we'll be removing any out of date or redundant items from the EMIS Library folders, and soon you'll no longer be able to access them.

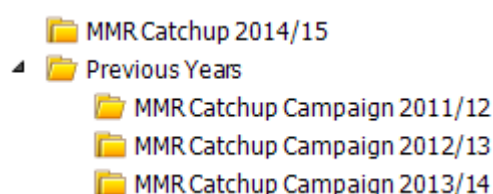

EMIS Library searches to be removed

Details about searches that are no longer supported and due to be deleted from the EMIS Library folders can be found below. If you regularly run any of these searches from the EMIS Library folders, you'll need to make sure you've copied them to your own organisation folders before they're removed to continue running them.

To copy an EMIS Library search, either left-click the search to highlight it and click **Copy** from the Population Reporting ribbon, or right-click the search and select **Copy**. Select the folder you want to copy this to and click **Paste** from the ribbon.

EMIS Library templates to be removed

Details about the templates that are no longer supported and due to be removed from the EMIS Library can be found in the table below. If you regularly run any of these templates and use them for consultations, you'll need to make sure you've copied them to your own organisation folders before they're removed to continue using them.

To copy an EMIS Library template, either left-click the template to highlight it and click **Copy** from the Template Manager/Resource Publisher ribbon, or right-click the template and select **Copy**. Select the folder you want to copy this to and either click **Paste** from the ribbon or by right-clicking the folder.
